4Life Targets Abortion Pills

By Mike Schell

Abortion remains the scourge of humanity. It has claimed more innocent lives (65 million in the US, 1.5 billion worldwide) than all the murders, wars, genocides, and Holocausts since Adam and Eve walked in the garden. Sadly, there's no end in sight. Since Roe was overturned, the abortion rate has risen. **It's all happening on our watch!**

Chemical abortions (via the abortion pills: mifepristone and misoprostol) now account for **70% of all abortions**. Developed in France in the early 1980's (originally known as RU-486), abortion pills were approved by the FDA for sale in the US in Sep 2000. Since then, they have become the dominant method of abortion for pregnancies up to 10 weeks.

The switch to mail-order abortion pills is easy to understand. Mail-order abortion pills cost $150, while surgical abortions run $500 to $800 in the first trimester, rising to as much as $2,000 for 2nd trimester procedures. Chemical abortions don't require a scheduled visit to Planned Parenthood and can be performed in the privacy of your home. But these abortions carry significant medical risks, especially when performed without medical oversight, which is common with telehealth mail-order purchases.

Regulating the use and sale of abortion pills has proven extremely difficult because they can be easily mailed from pro-abortion states with little chance of detection. In a study by Students for Life, the **drinking water** in Austin was found to be **contaminated with abortion-pill chemicals**. Ironically, Texas has strong criminal and civil penalties for abortion-pill providers, but clearly abortion pills are being used to end lives.

In response to the widespread use of abortion pills, Pikes Peak Citizens for Life (PPCFL) is launching 4Life, a peaceful demonstration at the intersection of abortion pill providers: CVS and Walgreens in Colorado.

Our plan is to station Pro-Life activists at each of the corners near these pharmacies for one-hour intervals, praying and holding signs designed to bring awareness to this growing evil – encouraging the boycott of these stores.

Central to the **4Life messaging** is an emphasis on Abortion Pill reversal options, which can save the life of the unborn child. Thankfully, a federal judge blocked a Colorado law that banned Bella Health from administering abortion reversal pills.

Thanksgiving Proclamation

"Whereas it is the duty of all Nations to acknowledge the **providence of Almighty God**, **to obey his will, to be grateful for his benefits**, and humbly to implore His protection and favor-- and whereas both Houses of Congress have by their joint Committee requested me to recommend to the People of the United States a day of public thanksgiving and prayer to be observed by acknowledging with grateful hearts the many signal **favors of Almighty God** especially by affording them an opportunity peaceably to establish a form of government for their safety and happiness.

Now therefore I do recommend and assign [Thanksgiving] to be devoted by the People of these States to the service of that great and glorious Being, who is the beneficent Author of all the good that was, that is, or that will be…That we may then all unite in **rendering unto Him our sincere and humble thanks**--for his kind care and protection of the People of this Country…for the civil and religious liberty with which we are blessed.

…and also that we may then unite in most humbly **offering our prayers and supplications** to the great Lord and Ruler of Nations and beseech Him to pardon our national and other transgressions-- to enable us all, whether in public or private stations, to perform our several and relative duties properly and punctually--to render our national government a blessing to all the people, by constantly being a Government of wise, just, and constitutional laws, discreetly and faithfully executed and obeyed.

…To promote the knowledge and practice of true religion and virtue.."

Given under my hand at the City of New York the third day of October in the year of our Lord 1789.

President **George Washington**

As we gather to celebrate Thanksgiving, we recommend that this magnificent proclamation by George Washington **be read at all dinner tables**.

Untold Stories of Abortion Pill Experiences – Are We Listening?

By Lynda Keck

Abortion pills are FDA-approved for pregnancies up to 10 weeks. Yet no controls prevent their use beyond 10 weeks. At 10 weeks, the human fetus has arms, legs, toes, fingers, forming eyes, a heartbeat, and brain activity. Mifepristone (taken first) blocks progesterone needed for fetal growth. It starves the baby to death. Emergency administration of the reverse abortion pill restores progesterone to save the baby if the mother changes her mind. Once Misoprostol (second pill) is ingested, there's no turning back since it forces waves of painful, violent contractions to separate the placenta from the wall of the uterus. The manufacturer and dispensers of these drugs tout that it is simple and takes place in the "comfort, safety, and privacy" of your own home!

Claims made report that 91% will experience only a heavy period with 9-16 days of bleeding. Yet, 1 in 12 women suffer more than 30 days of bleeding. At least 1% require medical intervention. From 2000-2018, 24 deaths were reported due to infections when the baby was not entirely aborted or the pregnancy was not properly identified as ectopic (tubal).

Statistics show that 9 out of 10 women seeking an abortion are unmarried, and the "father" is NOT involved and wants no further contact. As a result, women face extreme pain, possible medical trauma, depression, guilt, and loss of self-respect – all in isolation. The following videos document this. ***Do NOT view them with impressionable children present.***

The horror story told by Shanyce in the video Before You Take the Abortion Pill, Watch Her Story | Exclusive | Live Action recounts severe pain, high fever, infection, transfusions, an eventual coma, and a year-long path back to health. She is left with only half her uterus and still attends psychological therapy.

In a series of heartbreaking and brave personal accounts, women share their trauma related to the abortion pill. They describe homes that no longer feel like "happy and safe places" and how they felt upon seeing their aborted fetus. One woman shared her stark realization upon seeing her baby, saying, "the most beautiful thing I ever created, and I destroyed it." Watch women explain what Planned Parenthood did not prepare them for in these videos: I Saw My Baby | Abortion Pill Stories | Live Action

Why is the abortion industry pushing fetal poison and peddling it as "safe as Tylenol"? Learn more about this movement here: The True Story Behind the Abortion Pill | Live Action

Thank you for reading this newsletter series! At Pikes Peak Citizens for Life – we believe choices should be rooted in truth. We will continue to investigate and report to you, our readers.

Pray for an end to abortion -

If possible, please transfer all your prescriptions away from CVS and Walgreens, and do not use their services for vaccinations. Both of their pharmacies sell abortion pills in Colorado. Safeway and King Soopers, as well as Costco, do not sell abortion pills.

We realize that some insurance providers, such as Tricare have a contract with these pharmacies, so that making the switch may not be possible.

PPPCFL Has Moved!

After 20+ years in the back room of Hallenbeck Coin Gallery on Nevada, Pikes Peak Citizens for Life has moved to a modern office, saving $150/month. Our new address is

Pikes Peak Citizens for Life
